Lamprobe Treatments

from R800 / hr

Hyper-keratinised lesions like Age spots, Keratosis, Fibromas, Solar Keratosis and Skin Tags, whether small or very large, raised on a stalk or flat, are all epidermal irregularities, meaning that they are raised above the skin and not rooted into the dermis like moles, so treatment to remove these unsightly blemishes is focused on the lesion affecting only the epidermis of the skin. The *Lamprobe* can safely and effectively be used on all skin colours creating flawless skin without the risk of hypo-pigmentation.

TOP-UPS TO ANY FACIAL TREATMENTS - 15 Min

• LED Light Treatment	R165
• Microdermabrasion	R165
• Coax Firming	R165
